MEDIZINISCHE FAKULTÄT

Dear colleagues,

We are pleased to announce our 13th international workshop and course on salivary gland diseases together with well known specialists in this field.

Course lectures will cover basics, state of the art procedures and are furthermore focused mainly on the practical lessons. The course is suited not only for residents getting a "hands on" in salivary gland diagnosis and therapy, but also for experienced surgeons to learn more about the most recent advances in diagnostics and therapy. Besides continuing medical education, it is designed to encourage exchange of experience in a personal ambiance. Due to the growing interest the course is also focused on the development of minimally invasive surgical techniques and procedures.

The intended limited number of participants will have the opportunity to perform all established operative procedures of salivary gland surgery (cadaver dissection), to train in sialendoscopy under almost real conditions (fresh frozen cadavers) and to learn microsurgical techniques (rat model). By visiting the operating rooms and arrangements of our department for live surgery/procedures and the Institute of Anatomy (Head: Prof. W. Neuhuber) with its excellent equipment, individual teaching by the team of experts is provided.

We are looking forward to meeting you in Erlangen!

Heinrich Iro

13th International Course on Diagnostics and Surgery of Salivary Gland Diseases in Consideration of Minimally Invasive Techniques

Program

Wednesday October 19th, 2016

- 08.15 Registration
- 08.30 Reception and Introduction
- 09.45 Basic Lectures: Clinics, Imaging, Pathology, Diagnostics in Salivary Gland Diseases
- 12.00 Lunch
- 13.00 Diagnosis and Treatment of Benign Salivary Gland Tumors and Salivary Gland Malignomas

Thursday October 20th, 2016

- 07.45 Live Surgery, Hands-on Course: Microsurgery
- 12.00 Lunch
- 13.00 Live Extracorporeal Lithotripsy/Sialendoscopy
- 17.00 Minimal Invasive Techniques in Obstructive Salivary Gland Diseases, Ranula
- 20.00 Congress Dinner

Friday October 21st, 2016

- 07.45 Live Surgery, Hands-on Course: Microsurgery
- 12.00 Lunch
- 13.00 Complications after Salivary Gland Surgery
Surgery of the Paralyzed Face
Reconstructive Surgery of Parotid and Cheek Region
Botulinum-Toxin in Salivary Gland Diseases

Saturday October 22nd, 2016

- 07.30 Hands-on-Course: Sialendoscopy/Cadaver Dissection
- 14.00 End of Course
